

CK24M Pipe Clamp Probe

Features

- Clamp probe for pipe temperatures
- Measures temperature of pipe 0.25 to 1.5" inch in diameter accurately
- Use with any K-type thermocouple tester with sub-mini input
- Hands free; saves time
- More accurate than non-mechanical connections on round surfaces

Pipe Clamp Probe

Specifications

Temp. Range:	-40° to 250°F (-40° to 121°C)
Dimensions:	Max jaw opening: 1.5" / Nominal jaw opening: 0.25"
Lead Length:	39.4" (1M)
Insulation Material:	Polyurethane
Connector Type:	Sub-mini
